Objective

Motivated and industry-experienced computer programmer seeks graduate employment in an entry-level position

Education

- Bachelor of Science in Computer Science at Purdue University, West Lafayette, IN
  - Expected graduation date: May (GPA 3.41)
  - Concentrations: software engineering, database and information systems, machine intelligence
  - Relevant coursework: software testing, information systems, data mining

Experience

- Full-stack developer, Contango, West Lafayette 2022 – 2026
  - Built features to analyze, visualize, and manipulate grain marketing data
  - Developed ML regression models to predict barge shipping costs from scraped data
  - Used BeautifulSoup to retrieve weather and grain bid information from websites
  - Created a multi-API pipeline to initiate, transcribe, and analyze phone calls with LLMs in-app
- Junior data science developer, Solinftec, West Lafayette 2021 – 2022
  - Designed and built data visualization apps using Streamlit, Flask, and FastAPI
  - Used the Python Requests library to retrieve and collate performance metrics data from various sources

Leadership and Extracurriculars

- Tech team and setup assistant for college ministry 2024 – present
  - Served in a volunteer capacity to help prepare for weekly worship
  - Operated and set up audiovisual equipment
- Lead programmer on high school robotics team 2022 – 2023
  - Coded mechatronics software to enable custom-built robot to perform tasks in a competition environment
  - Delivered competition-winning code under high pressure and tight time constraints
- Taekwondo black belt 2018 – 2022
  - Committed to weekly classes in pursuit of the black belt rank
  - Helped to instruct and assist lower-ranked students

Skills

- Languages: fluent in Python, JavaScript/TypeScript; practiced in C, Java, HTML/CSS
- Frameworks/libraries: Vue.js, Django, Flask, FastAPI
- AI tools: Claude, Copilot
- Other development tools: Git, Docker, AWS
